

RELIABLE MONITORING OF PLANTS AND PRO- DUCTION LINES.

OUR CLAIM: **RELIABLE MONITORING** — **TAKING INTO ACCOUNT** **ALL CONDITIONS.**

Visualisations which make you able to produce safe, on schedule and in a safe and quality compliant way.

Whatever acutely impairs the performance of your facility: We treat your problems according to the motto: only the best is good enough!

We come to see the problem immediately and find out, visualise and solve it at once by using leading imaging- and video technologies. This monitoring is a reliable instrument as it allows you the full control of your plant:

From this time on you will be able to identify sources of interference promptly and take corresponding measures. You will observe the quality of all processes and the stability of your production precisely.

Finally you are able to act safer, plan better and increase your efficiency. You are welcome to use our know-how for this kind of problem solution but also for complexly system solutions.

We always get into action with the first appointment- Our promise!

- 1 Control station with central image processing
- 2 Automation and 3D technology for quality testing
- 3 Process visualisation production
- 4 Safety engineering and visual inspection logistics
- 5 Thermal imaging and video technology for hot areas
- 6 Automatic fire detection
- 7 Equipment for danger areas (EX areas)

DRAWING OUR BALANCE:
**CONSULTING 3250
PROJECTS IN 15 YEARS
— ONE TEAM.**

Experience - you can play safe with.

Reckon on a well attuned team and plants which function properly. Worldwide we visualised many complex and complicated production processes and solved plant problems.

There is very little we haven't seen yet.

In numerous projects we could demonstrate how the controlled supervision of plants helped companies to produce more effectively again. Technical managers and engineers appreciate this experience as well as our pleasure in finding prompt problem solutions, thinking outside the box and optimizing.

And this is exactly the reason why they also belong to our treasure trove of experience: **satisfied customers.**

FOR THIS BROCHURE WE REALLY DRESSED UP FOR THE NINES ...

... but dirtying our hands for you - this is what we like best!

PLEASE CONTACT US FOR:

- special solutions in process visualisation and safety engineering, e.g. cameras for hot areas up to 2400°C surrounding temperature, systems for nondestructive testing, thermal imaging of fire detection, 3D measuring systems and video technology of metallurgy processes
- cross-process system solutions
- video equipment for the protection of public safety DIN EN 50132-7

and for:

- support concerning CIP and quality management
